(1) The difference between the initial certified net taxable assessed value and the final net taxable assessed value, as reported in the District's comprehensive annual financial reports.

(2) Does not include adjustments to be made between the initial certification date and the final taxable assessed value to be adjusted as of the date the FYE 2018-19 comprehensive annual financial report is prepared.

NOTE: Valuations shown are certified taxable assessed values reported by the Appraisal District to the State Comptroller of Public Accounts. Certified values are subject to change throughout the year as contested values are resolved and the Appraisal District updates records. Net taxable assessed values, with the exception of FYE 2019, are as reported in the District's comprehensive annual financial report. NOTE: A large portion of the District's assessed valuation consists of oil and natural gas mineral interests. Because drilling activity is dependent upon the prices of volatile commodities, the District's tax base may grow or constrict in any particular year as a result of fluctuations in mineral values, as evidenced by the fluctuation over the last four years. As a result, the District's taxable assessed valuation and, therefore, the tax rates required to pay debt service on the District's bonds, may be subject to volatility in future years. Any adverse change in the prices of oil and gas would have an adverse effect on the District's taxable assessed valuation and, consequently, on the District's ad valorem tax revenues (see "Table 5 – Ten largest Taxpayers").

ECONOMIC CONCENTRATION NOTE: As reflected in the above table, nine of the top ten taxpayers (accounting for almost 54.22% of the appraised value in the District) are oil and gas industry participants. Fluctuations in the price of oil and gas affect the market value of such properties and can result in changes in the taxable value of such properties, resulting in less local tax revenue. Adverse developments in economic conditions, especially in the oil and gas industry could adversely impact the businesses that own such properties and the tax values in the District. If any major taxpayer (or a combination of taxpayers) were to default in the payment of taxes, the ability of the District to make timely payment of debt service on the Bonds will be dependent on its ability to enforce and liquidate its tax lien (which, in the event of bankruptcy, certain laws preclude until the automatic stay is lifted). Such process is time-consuming and can only occur annually; in the alternative, the District may sell tax anticipation notes until such amounts could be collected, if ever.
